

## CALL FOR PAPERS

SCHOOL WEB BASED MANAGEMENT APPLICATIONS

Presented by Mark Williamson and Tony Casale.

This session provides existing and potential school ICT leaders who are interested in web based applications providing new opportunities for online communication and collaboration.

ICT has the potential to enhance the management and administrative capacity of schools by automating processes, thereby freeing school managers to focus on instructional leadership.

Teched's online web based applications, automate school scheduling tasks, making paper based systems obsolete. It's a cost effective, time saving management facility that allows school leaders to effectively self manage their event, parent interviews, room / equipment allocations, yard duty rosters and surveys online.
