Advice to Contributors

The editorial panel welcomes contributions in the form of original articles, interviews, reports and reviews. Authors should ensure that their manuscript conforms loosely to the American Psychological Association (APA) bibliographic conventions.

All manuscripts should be clearly printed on one side of numbered pages in a publishable style (e.g., diagrams placed appropriately). Apart from the title page no author identification should appear on the manuscript. Figures, tables and graphs should be provided in camera-ready form. Photographs should be black and white rather than coloured. Authors should limit articles to a maximum of 4000 words and include an abstract of 100-120 words. Electronic copy in the form of a plain (unformatted) text (e.g., MS-DOS format, or via e-mail to the editor) should be submitted with the paper copy. Authors should include a brief autobiographical statement and a passport sized photograph.

Papers contributed for the Theme Papers or Contributed Papers sections will be anonymously refereed by at least two members of the Editorial Board. All submitted material will pass through an editorial phase to maintain journal standards and balanced coverage.

All material is copyright unless otherwise stated in writing and may not be reproduced in any form without the permission of the authors.

Opinions expressed by contributors do not necessarily represent the views of the editorial panel or the Australian Council for Computers in Education. The Australian Council for Computers in Education does not endorse products or services advertised in this journal.
