Welcome to the 11th volume of Australian Educational Computing. With this 11th volume comes a new editorial team comprising of Ron Oliver, Paul Newhouse, Martyn Wild, Sue Trinidad and myself, Jeremy Pagram. The new team from the West is going to try and fill the very capable shoes of Michael Ryan’s editorial team from Queensland. I’m sure you will all join with me in wishing Michael Ryan and his team all the best and offer them sincere thanks for the immense contribution they have made to the promotion of computer education in Australia.

AEC has now been in production for ten years, during which time enormous developments in technology have taken place. Computers have moved from stand alone machines for which very little software was available, machines which had minimal graphics capability and machines which were totally incompatible with each other to today where no matter which computer platform you favour, the technology enables the running of multimedia presentations, the ability to obtain information from anywhere in the world and interaction with other computer users no matter what computers they are using. In short we have moved from a situation in which computers were a toy for enthusiastic “technophiles” to one in which the computer is a potential tool for all teachers.

To commemorate the journal’s coverage of technological issues over the last decade and to mark the commencement of its second decade, this issue contains a number of invited articles from the original contributors to the journal ten years ago. They have been asked to present a retrospective look at computers in education over the last ten years and to give their perceptions of the future.

During the coming issues you will get to meet each member of the editorial team as they contribute an editorial column according to their research interests and specialisations. Here is a brief background of each editorial team member.

**RON OLIVER** - Is a lecturer in the Department of Library and Information Science at Edith Cowan University in Perth. Ron can be contacted at r.oliver@cowan.edu.au

**PAUL NEWHOUSE** - Is a lecturer in the Department of Multimedia Learning Technologies at Edith Cowan University in Perth. Paul can be contacted at p.newhouse@cowan.edu.au

**SUE TRINIDAD** - Is a lecturer in computer education at Curtin University of Technology in Perth. Sue can be contacted at TRINIDAD@educ.curtin.edu.au

**MARTYN WILD** - Is a lecturer in the Department of Multimedia Learning Technologies at Edith Cowan University in Perth. Martyn can be contacted at m.wild@cowan.edu.au

**JEREMY PAGRAM** (editorial team leader)
- I am also a lecturer in the Department of Multimedia Learning Technologies at Edith Cowan University in Perth. I can be contacted at j.pagram@cowan.edu.au

You are invited to submit articles for the second journal this year whose theme, “The information highway: its implications for educators,” relates specifically to the future of computing in education.

With the move to the West, you should note the revised submission details, located on the contents page. Please state whether articles are to go into the refereed or non-refereed section of the journal.
